

# Ever Think About What Happens to Your Old Cell Phone?

We Do.

EnviroSMART is now accepting cell phones  
– the newest addition to our recycling program!

**In the U.S. alone, over 100 million cell phones will be retired or discarded this year. Help make a world of difference by exerting just a few minutes of effort – Recycle your old cell phones today!**

EnviroSMART is an organization dedicated to making our world a better, cleaner place to live. Through the various programs we offer, we continue to help our customers and charitable organizations raise money for new equipment or supplies in fun and easy ways that are good for the environment. Recycling empty cartridges and cell phones keeps unwanted plastics out of our nation's landfills and helps conserve priceless, non-renewable resources.
